WANT TO SAFEGUARD YOUR HOME OR PROTECT YOUR BUSINESS?

b-link is an innovative new initiative that uses
technology to link personal and business security cameras
with IMPD for enhanced public safety

Register your contact information and the location of your home or business security cameras.

Locations of cameras registered are only available to IMPD personnel and registration of a camera does not constitute automatic consent for IMPD to obtain camera footage.

Using cloud-based secure technology, share your live stream video with IMPD to help provide access to your public-facing security cameras. Camera feeds are only accessed when an incident occurs within proximity of your location.

Participation in b-link requires certain technology requirements and may require installation or monthly fees.

Learn more about how you can be part of the solution at **blinkindy.org**
